

CONIN & PMIEF

250 CONIN's administrators and Agile Project Management

Within [PMI Educational Foundation](#) (PMIEF) scope and with [PMI Nuevo Cuyo Argentina](#) (PMINC) sponsorship, a 1-hour conference was given to 250 administrators of [CONIN Foundation](#) during its annual 2017 meeting in September.

CONIN Foundation is a non-profit organization who prevent childhood undernourishment, providing assistance to more than 4,500 kids and 3,500 mothers, with more than 2,000 volunteers in 94 prevention centers, located in 7 countries. Since the foundation by Doctor Abel Albino in 1993, year after year, CONIN programs continue to grow around the world and they recognized that Project Management is an essential tool for their development.

This was the fifth consecutive year that Pablo Lledó delivered project management tools as a pro-bono to CONIN. This year, after reviewing the project management tools CONIN is implementing (Project Charter, Scope Statement, WBS, Roles-Responsibilities, Risk Management Plan), we gave them tips regarding **Agile Project Management for nonprofits**.

The main tools that CONIN's administrators are implementing in their programs, were inspired on PMIEF materials like "[How Project Management Can Be Used in Your Nonprofit](#)", "[Project Management in NGOs](#)" and "[Project Management Skills for Life](#)".

CONIN's Directors supports the use of project management tools across all the organization.

Paula Aragoné, Relationships Manager from CONIN Mar del Plata, says: *we keep implementing the project management tools in every project to make our life much easier. Those agile concepts you mention today, are very appropriate to start implementing in our Foundation.*

Finally, Dr. Abel Albino gave an outstanding closing speech to inspire the 250 CONIN's administrators to keep implementing project management tools in an agile way for a sustainable development.
